3.

A. What is Inner Join?

- An inner join is a type of join operation that combines rows from two tables where there is a matching value in a specified column or set of columns.

B. What is Left Join(Or Left Outer Join)?

- A left join, also known as a left outer join, is a type of join operation that combines all rows from one table with matching rows from another table, and includes all the rows from the left table, even if there are no matching rows in the right table.

C. What is Right Join(Or Right Outer Join)?

- A right join, also known as a right outer join, is a type of join operation that combines all rows from one table with matching rows from another table, and includes all the rows from the right table, even if there are no matching rows in the left table.

D. What is Full Join(Or Full Outer Join)?

- A full join, also known as a full outer join, is a type of join operation that combines all rows from two tables, and includes all the rows from both tables, even if there are no matching rows in one or both tables.

E. What is Cross Join?

- A cross join, also known as a Cartesian product, is a type of join operation that combines every row from one table with every row from another table, resulting in a new table that contains all possible combinations of rows from both tables.

3. List the queries:

A. Inner Join:

```
1 SELECT *
2 FROM company
3 INNER JOIN worker
4 ON company.company_id = worker.company_id;
```

B. Left Join (or Left Outer Join):

```
1 SELECT *
2 FROM company
3 LEFT JOIN worker
4 ON company.company_id = worker.company_id;
```

C. Right Join (or Right Outer Join)

```
1 SELECT company.company_id, company.company_name, worker.first_name, worker.last_name
2 FROM company
3 RIGHT OUTER JOIN worker
4 ON company.company_id = worker.company_id;
5
```

D. Full Join (Full Outer Join)

```
1 SELECT *
2 FROM company
3 LEFT OUTER JOIN worker ON company.company_id = worker.company_id
4 UNION
5 SELECT *
6 FROM company
7 RIGHT OUTER JOIN worker ON company.company_id = worker.company_id;
```

E. Cross Join

```
1 SELECT *
2 FROM company
3 CROSS JOIN worker;
4
```
